

Energy Sense | Together We Can

Customized Energy Incentive Programs

Tailored to your specific needs, these customized incentive programs make it possible for commercial, industrial and agricultural members to receive energy incentives tailor-made to energy-efficient improvements not covered by other programs. Customized programs are also available for our electric members who own and operate schools and government buildings.

After all, conserving energy benefits all Pierce Pepin Cooperative Services members and our communities. More energy saved means less has to be produced, improving the quality of our environment.

Commercial, Industrial & Agricultural Program

Small Business Energy Audit

(Limit 1 per account)

This program provides a “no-cost” energy audit for your business. PPCS together with GEN~SYS Energy will conduct the energy audit for your business and provide a summary of results and recommendations for energy-efficient improvements.

GEN~SYS Energy is a wholesale electric power marketing and service organization that offers a full range of power supply options and energy management services to Dairyland Power Cooperative, our wholesale power supplier, and its member cooperatives, including PPCS.

Customized Energy Incentive

(Limit 1 per account)

This incentive is available for energy-efficient improvements recommended by a certified energy audit that are based on demand reduction (kW) and annual energy (kWh) savings. The incentive will not exceed \$1,500 or one-half the cost of improvements. Project examples include:

- Modification of existing equipment to make it more energy efficient
- New energy management technologies

School & Government Building Program

Small Business Energy Audit

(Limit 1 per account)

See program description for Commercial, Industrial & Agricultural program above.

Customized Energy Incentive

(Limit 1 per account)

This incentive is available for energy-efficient improvements recommended by a certified energy audit that are based on demand

reduction (kW) and annual energy (kWh) savings. The incentive will not exceed \$3,000 or the cost of improvements.

Project examples include:

- Modification of existing equipment to make it more energy efficient
- New energy management technologies

Terms and Conditions

General Eligibility

This program provides rebates/incentives for the qualifying purchase and installation of products and/or services for members receiving electric service from PPCS. Products and services must be purchased between July 1, 2007 and December 31, 2008. Applicants will be accepted on a first-come, first-served basis. Completed rebate/incentive forms and required documentation must be received by PPCS no later than January 10, 2009 (see incentive form on reverse side for details). Rebate/incentive will not exceed the purchase price.

Verification

PPCS reserves the right to verify sales receipts and/or the installation of products and services before issuing rebates/incentives. A random inspection may be conducted to verify installations. All rebates/incentives will be issued in the form of a credit to the member's electric account. **Please allow four to six weeks to process the rebate/incentive application.**

Program Modification

PPCS does not guarantee that the energy conservation products purchased and installed under this program offer will result in energy and cost savings. PPCS reserves the right to deny or limit any rebate/incentive. Rebates/incentives are limited to the available funds and may be discontinued before the end of the program period at the sole discretion of the cooperative.

Rebate/Incentive Application Forms

Forms are available at the cooperative office and at www.piercepepin.com. For more information on energy efficiency/conservation programs or savings opportunities, contact our Member Services Department.

This program is part of our “Commitment to Community” as a rural electric cooperative and is funded in part through the public benefits program.
