

Energy Sense | Together We Can

Small-Scale Renewable Energy Incentive Program

This program supports research and development of financially viable small-scale renewable energy projects.

Renewable Energy Site Assessment Incentive

(Limit 1 per account)

Up to \$400 or 60% of the cost of a site assessment by a certified site assessor for a small-scale renewable energy project. Site assessor must be certified by the Midwest Renewable Energy Association (MREA).

A certified assessor will visit your home or business property and analyze its renewable energy potential. Some assessors can evaluate multiple technologies during your site assessment. An assessor will give a written report that provides:

- A basic analysis of your energy needs.
- Recommendations for energy efficiency to help lower your energy use and reduce the size and type of the renewable energy system you need.
- An evaluation of the renewable energy resource at your site
- Recommendations for size and type of renewable energy system to meet your needs.
- Estimated output of the renewable energy system, based on the resource estimate.
- Information on the best place to locate a system on your property.
- A general cost estimate for the system.
- The next steps for completing your project.

Renewable Energy Grant

(Limit 1 per account)

Up to \$1,500 or 25% of the project investment for a small-scale renewable energy project with a capacity of 10kW to 40kW.

Terms and Conditions

General Eligibility

This program provides rebates/incentives for the qualifying purchase and installation of products and/or services for members receiving electric service from PPCS. Products and services must be purchased between July 1, 2007 and December 31, 2008. Applicants will be accepted on a first-come, first-served basis. Completed rebate/incentive forms and required documentation must be received by PPCS no later than January 10, 2009 (see incentive form on reverse side for details). Rebate/incentive will not exceed the purchase price.

Verification

PPCS reserves the right to verify sales receipts and/or the installation of products and services before issuing rebates/incentives. A random inspection may be conducted to verify installations. All rebates/incentives will be issued in the form of a credit to the member's electric account. **Please allow four to six weeks to process the rebate/incentive application.**

Program Modification

PPCS does not guarantee that the energy conservation products purchased and installed under this program offer will result in energy and cost savings. PPCS reserves the right to deny or limit any rebate/incentive. Rebates/incentives are limited to the available funds and may be discontinued before the end of the program period at the sole discretion of the cooperative.

Rebate/Incentive Application Forms

Forms are available at the cooperative office and at www.piercepin.com. For more information on energy efficiency/conservation programs or savings opportunities, contact our Member Services Department.

This program is part of our "Commitment to Community" as a rural electric cooperative and is funded in part through the public benefits program.
